Product Description

Rubix

Offering six distinct configurations, the Rubix is the most customizable sleep solution on the market.

Using three interchangeable foams within one zippered Euro top enclosure, you can easily rotate or combine layers to achieve the comfort, firmness, and depth of support that's just right for you.

- The Rubix comes with three 2" Energex™ foams—each foam features a different level of firmness, ranging from soft to medium to firm. Pair any combination of two foams in our unique zippered Euro top to create your ideal sleep experience.
 - Each patented layer of Energex™ is an energetic alternative to conventional viscoelastic foam that couples all of the pressure mapping of visco with the responsiveness of latex.
 - A 1.5" quilted comfort surface layer promotes greater airflow for a cooler night's sleep.
 - A 2" intermediate layer of foam offers a gentler transition to the firmer, high-density base foam.
 - A 6" core of up to 1,024 individually encased Ascension® coils provides unparalleled support, coupled with superior motion isolation.
 - A 1" high-density foam base adds durability to the mattress while reinforcing individually encased coils as they compress.
 - Delivered in a box, allowing for easy transportation from your door to your bedroom.
 - Comes with a 10-year warranty.
 - Offered with a 120-night risk free trial.
-
