Product Description

SHOULDER CARBONCOOL® LT + OMNIPHASE

The most advanced pillow cooling technology available, Omniphase® phase change material provides continual temperature regulation with ventilation for superior airflow. Phase change molecules capture and release heat as needed to maintain the optimum sleep temperature throughout the night. To further the cooling properties, activated carbon infused in the foam creates a pathway to filter heat away from the head, face, and neck. The unique shoulder cutout is designed specifically for side sleepers to align the head and neck, and the supportive memory foam relieves pressure points. Lastly, a Tencel™ cover creates a soft, smooth surface that helps control humidity while allowing maximum exposure to the Omniphase® coating. For every pillow purchased, the [MALOUF FOUNDATION](#) will donate a significant portion to fight child sexual exploitation.

- Carbon-infused foam moves heat away from the body
 - OmniPhase® phase change material absorbs and dissipates heat
 - Shoulder cutout designed specifically for side sleepers
 - Ventilated for increased airflow and breathability
 - Soft, supportive memory foam relieves pressure points
 - Tencel™ removable cover aids in optimal sleeping temperatures
 - Every purchase supports the Malouf Foundation
 - 5-year warranty guarantees high-quality construction
-
